

DDS New DL/ID Card Information

Card Production Services (CPS)

- Regional rollout during Summer 2019
- System Features:
 - Permanent Driver's License/Identification Card (DL/ID) is the most secure Georgia has ever produced
 - Made of polycarbonate which is harder to tamper and lasts longer
 - Central processing of permanent DL/ID facilitates backroom validation
 - Photo Interim provided for customers in person
 - Previously issued cards are marked and returned to customers for ID purposes

CPS Customer Benefits

- As an agency responsible for enforcing and administering state laws and regulations relating to driver's licenses and in partnership with law enforcement and the Department of Homeland Security, the new DL/ID system has been designed to make Georgia cards more secure and our roadways safer
- Data on the front of the card can be validated by reading the unencrypted 2D barcode assisting organizations such as banks, bars and law enforcement
- Multiple levels of card security features make the card harder to counterfeit thereby reducing fraud and ensuring only those who are qualified are issued a license or ID
- Processes in the new system will improve the integrity of the data reducing opportunities for identity theft
- The back-room identity verification process will help combat identity theft by allowing DDS to verify photographs stored in the system with customers presenting themselves for new DL/ID
- Enforcement agencies will have timely access to data including photos

CPS Card Design Features:

- The Peach, outline of the State and Savannah Talmadge Bridge are featured in prominent positions.
- Contains overt and covert security features that are difficult to detect and replicate and render the card tamper and fraud resistant.
- DDS card design team, utilizing input from representatives of law enforcement, retailers and others, designed the features used in the new driver license and ID cards.
- Consideration was given to aesthetics and usability of the card. Increased readability, improved methods of identifying minors and card security were the most frequently requested design changes.

Current DL/ID is Valid Until it Expires

Don't Renew Until it's Due!

DDS New License Front – Public Information

continued

The new Polycarbonate card makes a very distinctive sound when dropped perpendicular onto a hard surface; almost a “ping” sound

The resolution of the photos exceeds what is typically available using other conventional printing methods
