

Below is a count of Administrative License Suspensions (ALS), Refusals, and Driving Under the Influence (DUI) convictions processed at the Department of Driver Services.

Report Notations:

ALS – Administrative License Suspension, resulting from a DUI arrest, when state administered test shows blood alcohol content (BAC) is .08 or higher for drivers over 21 years old in non-commercial vehicles, .02 or higher for drivers under 21, or .04 or higher for drivers in a commercial motor vehicle. This is an administrative action and not a criminal conviction.

Refusal – Implied Consent Suspension, resulting from a DUI arrest when the individual refuses the state administered test. This is an administrative action and not a criminal conviction.

Conviction – Criminal convictions received from courts as a result of the criminal prosecution of a DUI. It should be noted that not all DUI arrests lead to DUI convictions.
